LESTER ROWNTREE

Garden Consultant

RURAL ROUTE NO. 1, BOX 178

CARMEL CALIFORNIA, U. S. A.

PLEASE READ BEFORE ORDERING

In California sow wild flower seed at the beginning of the rainy season. Californians order early. If the land can be watered, seed may be sown up to the end of April. In eastern gardens sow in Spring as soon as the ground is workable. Rake the seed lightly into ground which has been dug or plowed and then smoothed over.

For the present it is necessary for me to manage alone and other work must be done to keep the seed business going. Therefore I must again limit orderfilling to the months of September, October, November, February and March. Orders will be acknowledged when received.

Terms are cash with order or I will send C. O. D. if one-third is paid as a deposit. Please use enclosed order blank and give substitutes, for the amount of fresh seed of some species is small. Postage is prepaid in U. S. A. only. Seeds are insured only at the customer's request. I take no responsibility for safe carriage.

I send honest seed, cleaned as well as is possible under the circumstances, but because I cannot control the growing condition of this seed I give no guarantee of behavior. The smallest acceptable order is fifty cents.

Seeds 25 cts per packet unless otherwise indicated.

Trade packets 50 cts.

Prices subject to change.

SHRUBS

The following shrubs are evergreen except where marked d. for deciduous. Some shrub seed are sent out in the pod as they lose their vitality when shelled.

ACACIA CONSTRICTA, Arizona. Pretty shrub with orange-yellow flower. 6 ft. d.

" **FARNESIANA**, Sweet Acacia. Ornamental. Fragrant yellow flower. 9ft. d.

" **GREGII**, Catclaw. Fragrant yellow flowers. 7ft. d.

ARCTOSTAPHYLOS CANESCENS, Hoary Manzanita. Blooms at Christmas. 4 ft.

" **DENSIFLORA HYBRIDS**. Very fine. 4 ft.

" **REPENS**, Creeping Barberry. Very hardy. 8 inches.

CARPENTERIA CALIFORNICA, Bush Anemone. Large white flowers. 6 ft.

CEANOTHUS are notorious hybridizers and as lack of gas has limited collecting in the field, it has been necessary to take some seed from wild flower gardens. This seed may produce hybrids but as wild hybrids are more vigorous than their types and are often extremely beautiful, I do not consider this a drawback.
